Driving Profitable Growth : A Strategic Analysis

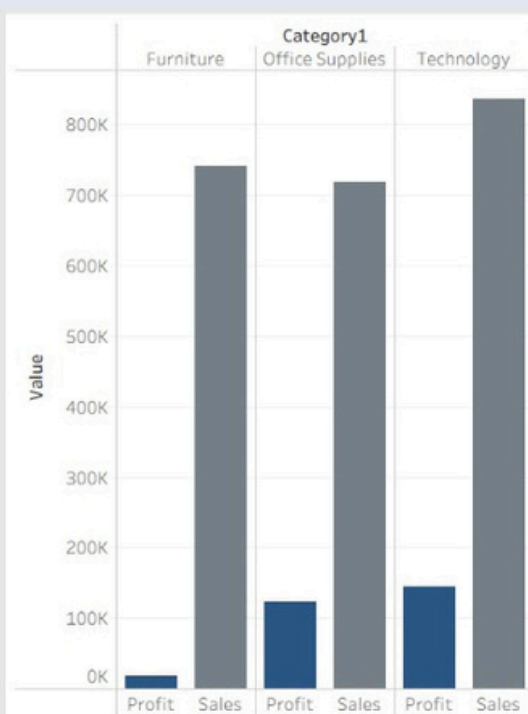

< 1/5 >

Profit
49,544 93,439

1. The Big Picture : A Healthy and Growing Buisness

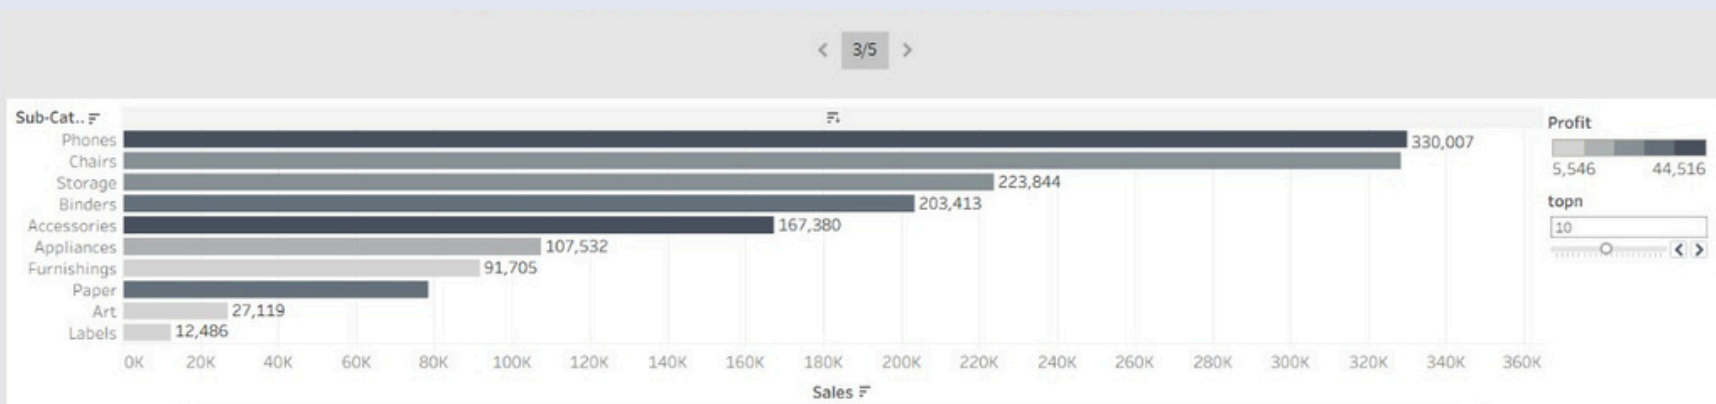

First Let's look at our overall performance . We are a \$2.3 million buisnees with a Total Profit of over \$296,000 , which translates to a strong 12.47% Profit Ratio .Even better , our buisness is on a clear upward trajectory . As you can see in the "Sales Over Time" and "Profit Over Time" Charts, we've experienced solid , year -over-year growth in both sales and profit from 2014 to 2017

Measure Names
■ Profit
■ Sales

2. Our Core Strength: Technology is King

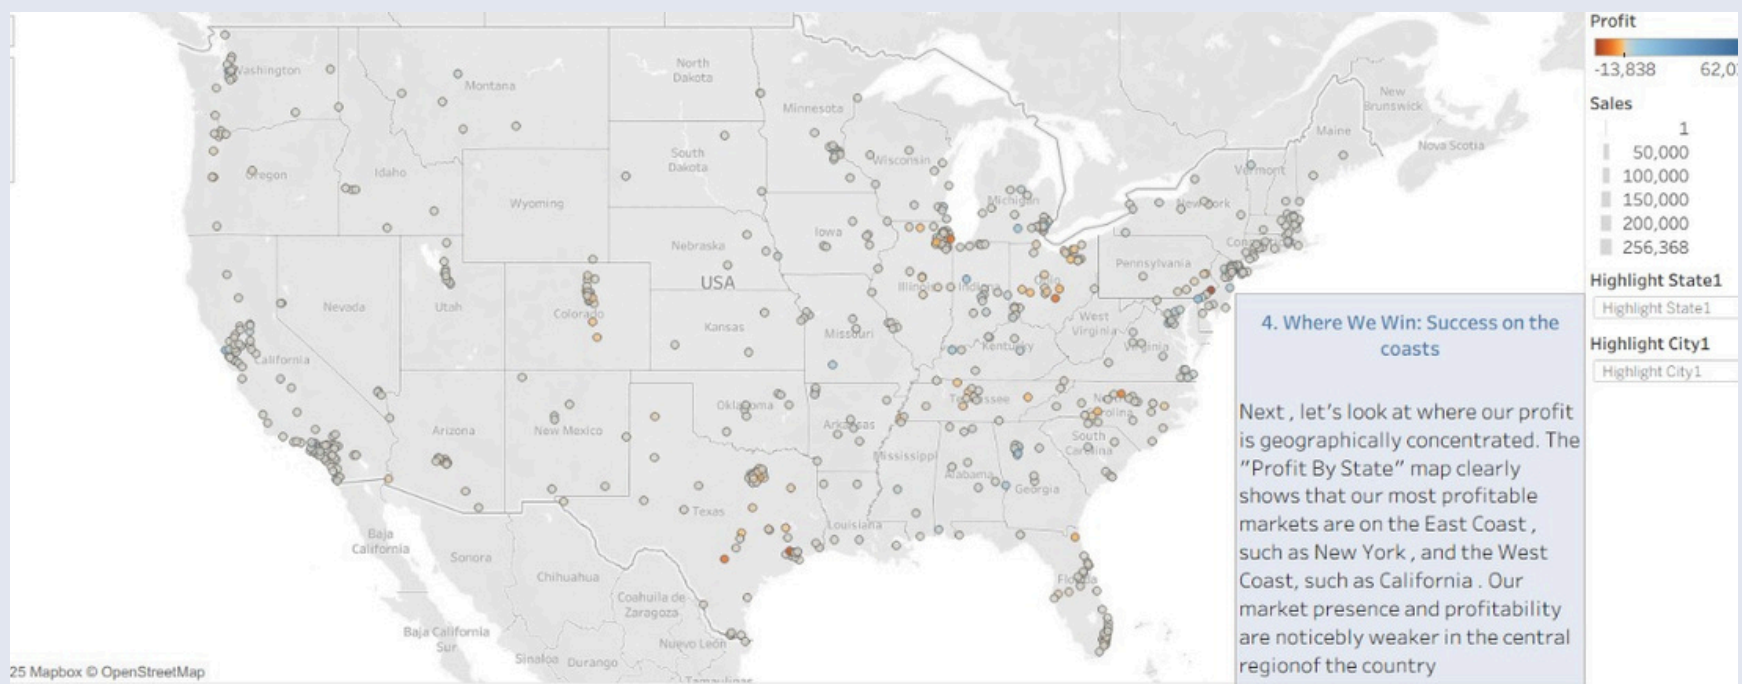

So, where is this growth coming from?
We operate across three main categories:
Furniture , Office Supplies and Technology .
The data clearly shows that Technology is our star performer. It leads with the highest sales and generates significantly more profit thanthe other two categories combined

3. A Key Challenge : The Furniture Profitability Problem

However , this analysis also highlights a major challenge .

Our Furniture category generates high sales volume , nearly on par with Technology , but its profitability is alarmingly low . When we drill down , we see that sub-categories like 'Furnishings' contribute to sales but deliver almost no profit . This represents a significant opportunity . If we can improve the profitability of our Furniture category, our overall bottom line will increase dramatically .

5. Strategic Recommendations

Based on this analysis , we have three clear , data -driven recommendations:

Double Down on Technology : We should increase our investment in marketing and inventory for high -performing, high-profit sub-categories like 'Phones' and 'Chairs'.

Fix Furniture Margins : We need to conduct an urgent review of the pricing , supplier costs and shipping logistics for Low -margin items like 'Furnishings' to make them profitable.

Develop a Regional Strategy : We must create a targeted marketing and sales startegy for the central United States to grow our market share and improve profitability in that region.
